Preface

Google plus Auto Poster (GPAP) is an API (Developed in PHP) that gives you an ability to automatically re-post your posts or announcements of your posts to most popular Social Network site Google Plus. With the Use of GPAP you can save your valuable time and connect with friends and relative easily using GPAP. You have to just write the post and API will do the rest.

Google Plus Auto Poster (APAP) API developed with the intention to provide a programming interface to users so that it will become easier to integrate their system (Website, Application etc.) to Google+ for auto posting.

Presently Google plus Auto Poster available for Google plus, soon it will be available for other social network site such as Facebook, Twitter, Pinterest, LinkedIn, Tumblr, Blogger/Blogspot etc.

GPAP Auto Post for to following pages
